**Re: North Carolina RSA #4, Inc., North Carolina RSA No. 6, Inc., USCOC of
North Carolina RSA #7, Inc., North Carolina RSA #9, Inc., Jacksonville
Cellular Telephone Company and Wilmington Cellular Telephone Company
Petition for Designation as an Eligible Telecommunications
Carrier in the State of North Carolina
CC Docket No. 96-45**

Dear Madam Secretary:

North Carolina RSA #4, Inc., North Carolina RSA No. 6, Inc., USCOC of North Carolina RSA #7, Inc., North Carolina RSA #9, Inc., Jacksonville Cellular Telephone Company and Wilmington Cellular Telephone Company (collectively, "U.S. Cellular") hereby amends its above-referenced petition for ETC status in the State of North Carolina¹ to provide additional information requested by the Commission, through its Wireline Competition Bureau ("WCB") and consistent with the Commission's *Virginia Cellular* and *Highland Cellular* decisions.² Specifically, while U.S. Cellular's Petition stated that the Company would undertake

¹ USCOC of Virginia RSA #3, Inc., USCOC of Virginia RSA #2, Inc., Virginia RSA #4, Inc., Virginia RSA #7, Inc. Ohio State Cellular Telephone Company, Inc. and Charlottesville Cellular Partnership, Petition for Designation as an Eligible Telecommunications Carrier in the Commonwealth of Virginia, CC Docket No. 96-45 (filed April 13, 2004) ("Petition"). See *Parties are Invited to Comment on Petitions for Eligible Telecommunications Carrier Designations*, Public Notice, DA 04-1445 (rel. May 21, 2004, 2004) ("Public Notice").

² *Virginia Cellular, LLC*, 19 FCC Rcd 1563 (2004), *recon. pending* ("Virginia Cellular"); *Highland Cellular, Inc.*, 19 FCC Rcd 6422 (2004), *recon. pending* ("Highland Cellular").

the same commitments that were made by Virginia Cellular and adopted as conditions of its designation by the FCC, U.S. Cellular now provides additional information regarding its specific commitments. U.S. Cellular also provides additional analysis regarding impacts on the fund. Finally, U.S. Cellular requests clarification that no further redefinition with respect to the service area of United Intermountain Telephone Company is necessary.

As a preliminary matter, U.S. Cellular fully commits to comply with all of the annual reporting requirements adopted in the *Report and Order* adopted earlier this year, including the filing of a five-year network improvement plan, network outage reports, and other newly required certifications and reports adopted therein. U.S. Cellular understands that those new reporting conditions, upon OMB approval, will require all ETCs to file their first reports on October 1, 2006. U.S. Cellular will comply with this and all other applicable rules and conditions adopted by the Commission.

A. Commitment to Undertake *Virginia Cellular* Commitments.

U.S. Cellular is committed to undertaking the same compliance and reporting obligations Virginia Cellular agreed to undertake as a condition of its designation in 2004. In its Petition, U.S. Cellular set forth its commitment to provide service upon reasonable request, to report the number of consumer complaints per 1,000 handsets, and to comply with the Cellular Telecommunications Industry Association Consumer Code for Wireless Service. U.S. Cellular provides additional detail with respect to its Virginia Cellular commitments, as follows:

1. Service Provisioning Commitment.

To elaborate on its commitment to provide service to consumers upon reasonable request,³ U.S. Cellular is pleased to make the following commitment to provision service to requesting customers:

In response to such requests for service at a residence or business, U.S. Cellular will take the following steps:

1. If a request comes from a customer within its existing network, U.S. Cellular will provide service immediately using its standard customer equipment.

2. If a request comes from a customer residing in any area where U.S. Cellular does not provide service, U.S. Cellular will take a series of steps to provide service.

* First, it will determine whether the customer's equipment can be modified or replaced to provide acceptable service.

* Second, it will determine whether a roof-mounted antenna or other network equipment can be deployed at the premises to provide service.

³ See Petition at p. 3.

* Third, it will determine whether adjustments at the nearest cell site can be made to provide service.

* Fourth, it will determine whether there are any other adjustments to network or customer facilities which can be made to provide service.

* Fifth, it will explore the possibility of offering the resold service of carriers that have facilities available to that location.

* Sixth, U.S. Cellular will determine whether an additional cell site, a cell-extender, or repeater can be employed or can be constructed to provide service, and evaluate the costs and benefits of using scarce high-cost support to serve the number of customers requesting service. If there is no possibility of providing service short of these measures, U.S. Cellular will notify the customer and provide the Commission with an annual report of how many requests for service could not be filled. The Commission will retain authority to resolve any customer complaints that U.S. Cellular has refused to respond to a reasonable request for service.

U.S. Cellular believes these service provisioning commitments will ensure that the company is responsive to consumers' needs while acting as a proper steward of available high-cost support funds.

2. Construction Plans

In *Virginia Cellular*, the petitioner provided plans for using high-cost funds to improve its facilities and reach out to areas that it does not currently serve.⁴ Consistent with *Virginia Cellular*, U.S. Cellular committed in its Petition to "construct[] additional cell sites in high-cost areas to improve the quality of its radio frequency ("RF") signal" so that consumers will have "a greater choice among service providers and will receive more reliable service."⁵ U.S. Cellular now provides additional details regarding the network improvements referred to in the Petition. Specifically, within the first 18 months of receiving high-cost support, U.S. Cellular commits to construct cell towers or collocate antennas to bring new or improved service to the following 20 communities: Reese Gap, Green Mountain, Shiloh, Simon, Castalia, Epsom, Grassy Creek, Phoebes Creek, Stovall, Draughn, Tillery, Colerain, Harrellsville, Acre, Fairfield, Gum Neck, Nags Head, Pamlico Beach, Stumpy Point, and Wenona. As with the network improvements proposed by Virginia Cellular, the specific parameters of this plan could change as a result of fluctuating support levels, difficulty obtaining zoning and other necessary approvals, or shifts in consumer demand. The proposed sites are projected to cost an estimated \$250,000 to \$400,000 each. This constitutes U.S. Cellular's firm commitment to use high-cost support to undertake

⁴ See *Virginia Cellular*, *supra*, 19 FCC Rcd at 1571, para. 16. Specifically, Virginia Cellular committed to use universal service support to construct 11 new cell sites in sparsely populated areas within its ETC service area. The FCC noted that the carrier's build-out plan "may evolve over time" as a result of shifts in consumer demand. *Id.*

⁵ Petition at p. 13.

facilities construction and upgrades that would not occur but for the availability of such support. U.S. Cellular additionally commits to report on its progress in annual filings to verify that support was properly spent and to explain any changes in construction plans,⁶ also consistent with Virginia Cellular's commitments.⁷

As noted above, U.S. Cellular fully commits to develop a five-year network improvement plan and file it with the Commission on or before October 1, 2006, the date on which all ETCs are required to file their first report under the newly adopted rules.

B. Impact on Size of Fund.

In last year's *Nextel Partners* order, the FCC addressed the question of whether designating NPCR, Inc. d/b/a Nextel Partners ("Nextel") as an ETC in Alabama, Florida, Georgia, New York, Pennsylvania, Tennessee, and Virginia would cause undue strain on the federal high-cost Fund.⁸ In making that determination, the FCC used the unrealistic scenario of Nextel capturing each and every ILEC subscriber in Alabama – the state in which the affected ILECs receive the largest amount of support – which would result in Nextel receiving support equivalent to 1.88 percent of the total high-cost Fund.⁹ Based on that analysis, the FCC concluded that Nextel's designation in all seven states would not "dramatically burden" the federal high-cost Fund.¹⁰

Here as well, U.S. Cellular's designation will not burden the USF. USAC projects that the funds that U.S. Cellular will receive annually if it is designated as an ETC in North Carolina will be approximately \$5 million, less than 0.13 percent of all high-cost support. Even in the implausible event U.S. Cellular captures all of the ILEC subscribers in its North Carolina service area, U.S. Cellular estimates its total support would amount to less than 1.30 percent of the Fund,¹¹ a significantly lower percentage than the 1.88 figure corresponding to just one of the seven states approved in the *Nextel Partners* order. By any measure, therefore, a grant of the instant Petition will not unduly burden the Fund.

⁶ See *id.* at pp. 13-14.

⁷ See *Virginia Cellular*, *supra*, 19 FCC Rcd at 1584, para. 46.

⁸ See *See NPCR, Inc. d/b/a Nextel Partners*, 19 FCC Rcd 16530, 16540 (2004) ("*Nextel Partners*").

⁹ See *id.* at n 69.

¹⁰ See *id.*

¹¹ This estimate is based on the total amount of support the affected ILECs receive. However, the actual amount would be much lower because this estimate does not exclude the portions of ILEC study areas not covered by U.S. Cellular's Petition.

C. Removal of Partial Wire Centers.

In its *Highland Cellular* decision, the FCC declined to designate a competitive ETC for a portion of a rural ILEC wire center, declaring that the wire center is “an appropriate minimum geographic area for ETC designation[.]”¹² Consistent with its decision to make ETC designations only for entire rural ILEC wire centers, the FCC has accepted commitments by carriers to remove partial rural ILEC wire centers either by (1) removing them from the proposed ETC service area; or (2) committing to serve the remaining portions of the wire center through a combination of their own facilities and resale or roaming.

In order to comply with this requirement, U.S. Cellular now modifies its requested ETC service area to remove all partial rural ILEC wire centers from its proposed ETC service area in North Carolina. Where U.S. Cellular’s licensed service area covered only a small portion of a rural wire center, U.S. Cellular has withdrawn the wire center from consideration. Where U.S. Cellular’s licensed service area covers the majority of a rural wire center, U.S. Cellular commits to cover the remaining portion through a combination of its own facilities and resale or roaming. A revised map reflecting these changes is attached. Also attached are revised versions of Exhibits C and D to its Petition which listed, respectively, the wire centers eligible for immediate designation and those for which redefinition is requested.¹³

As a result of the removal of partial rural wire centers, three items should be noted:

1. Citizens Telephone Co., Ellerbee Telephone Co., MEBTEL, Inc., and Randolph Telephone Co., all of which had only a portion of one wire center each within U.S. Cellular’s originally proposed ETC service area, are now withdrawn entirely from consideration. U.S. Cellular no longer seeks designation in any portion of these ILECs’ service areas.

2. The study areas of Surry Telephone Membership Corp. and Wilkes Telephone Membership Corp. are now entirely within U.S. Cellular’s proposed ETC service area. (See (D) below).

3. U.S. Cellular’s cream-skimming analysis is affected because various wire centers previously indicated as “partial” are now either included or excluded in their entirety. Accordingly, U.S. Cellular has prepared a revised set of population density spreadsheets, attached as revised Exhibit I. In each case, it is clear that U.S. Cellular is seeking to serve the higher-cost, lower-density portions of the rural ILECs’ study areas.

¹² *Highland Cellular*, *supra*, 19 FCC Rcd at 6438.

¹³ In revised Exhibit D, the wire centers previously designated as “partial” are shaded in grey.

November 4, 2005

Page 6 of 7

D. Changes to Redefinition Request

Because of its commitment to cover the remaining portions of certain wire centers through a combination of its own facilities and resale or roaming, U.S. Cellular's proposed ETC service area now covers the entirety of Surry Telephone Membership Corp. and Wilkes Telephone Membership Corp. Accordingly, U.S. Cellular amends its Petition to state that it does not seek redefinition of those two rural ILECs' service areas. U.S. Cellular has attached revised versions of the wire center exhibits originally provided with the Petition to reflect these changes.

We trust that you will find this information to be useful. Should you have any questions or require any additional information, please contact undersigned counsel directly.
